ASIAN

ASIAN TESTING & INSPECTION SERVICES LLP

WHERE VALUES MEET RESULTS

EXCELLENCE IN

TESTING & INSPECTION

We are committed to delivering precise, reliable and efficient testing solutions that ensure quality, safety and compliance across industries.

ACCURATE RESULTS

RELIABLE TESTING

ADVANCED TECHNOLOGY

EXPERT TEAM

QUALITY ASSURED

WE OPERATE IN MECHANICAL, CHEMICAL, METALLOGRAPHY, CORROSION & NDT TESTING OF METAL AND ALLOYS AS PER

ISO/IEC 17025:2017 STANDARD

Near Ganesh Temple,
Ambernath MIDC Road,
Kalyan (E) - 421306

ASIAN TESTING & INSPECTION SERVICES LLP

WHERE VALUES MEET RESULTS

INDUSTRIES WE SERVE

CHEMICAL TESTING

Advanced chemical analysis to ensure material composition and quality.

CORROSION TESTING

Evaluating corrosion resistance and performance under various environments.

METALLOGRAPHY TESTING

Microstructure examination for quality control and failure analysis.

MECHANICAL TESTING

Comprehensive testing of mechanical properties for reliable performance.

NON DESTRUCTIVE TESTING (NDT)

Advanced NDT methods to detect defects without damaging materials.

ASIAN TESTING & INSPECTION SERVICES LLP

WHERE VALUES MEET RESULTS

TESTING FACILITIES

Chemical test for ferrous and non-ferrous

Chemical testing of ferrous metal alloys by OES :

- Carbon Steel
- Stainless Steel
- Cast Iron
- Low Alloy Steel
- Tool Steel
- Free Cutting Steel

Chemical testing of Non-Ferrous metal alloys by OES :

- Copper Base: Pure Copper, Brass, Bronze, Cupronickel etc.
- Nickel Base: Pure Nickel, Hastelloy, Monel, Inconel.
- Aluminum Base: Pure Aluminum, Aluminium Alloys it's Casting
- Titanium Base: Pure Titanium and its alloys
- Zinc Base
- Tin Base
- Cobalt Base
- Lead Base

Mechanical test for ferrous, non-ferrous and other alloys

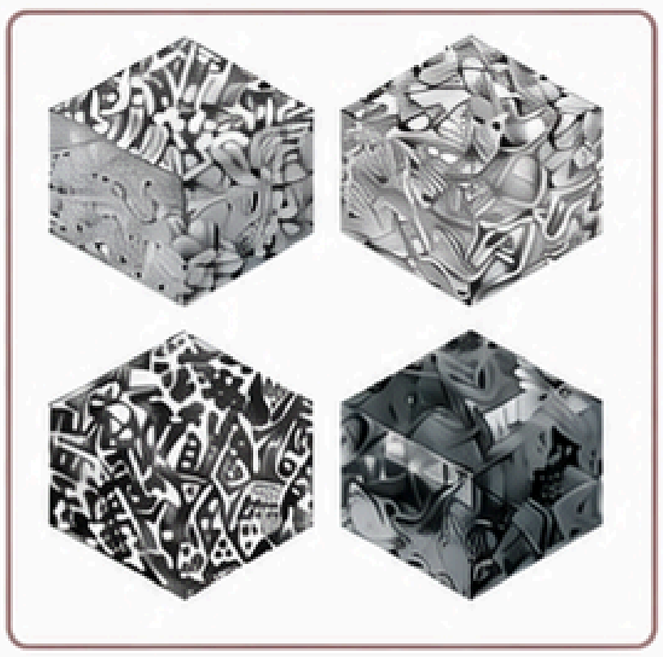

All mechanical testing of Ferrous, Non-Ferrous And Other Alloys can be performed in our laboratory as follow:

- Tensile Test on Plate, Pipes, Bars, Billets, Wires, TMT/TOR Steel, Extruded Shape, Angles and thin Foils with 0.2% Proof Stress
- Low Temperature Tensile Test up to -196°C
- Elevated Temperature Tensile Test up to 1100°C
- Hardness Test: As per **Brinell** , Vickers, Rockwell Scale B & C
- Charpy / IZOD Impact Test as per IS/ISO and ASTM Standards
- Compression Test on Spring
- Proof Load test on Nut
- Shear Test
- Through Thickness
- All Weld Tensile
- Welder / Procedure Qualification on Welded Coupon Load Testing on Hooks
- Other Testing like Bend-Rebend, -Flaring, Mock-up Test, MLP, etc..

Metallography test for ferrous, non-ferrous and other alloys

By examining and quantifying a material's micro-structure, its performance can be better understood. Thus, metallography is used in almost all stages during the lifetime of a component: from the initial materials development to inspection, production, manufacturing process control, and even failure analysis if needed. The principles of metallography help to ensure product reliability including:

- Micro Structures of Metal with Image
- Inclusion, Macro, Case Depth, Grain Size, Decarb, Nodularity, Spheronization, etc.
- Coating Thickness by Microscopic Method
- Ferrite by Metallography and by ferritoscope
- Brazed Joint, Welded Joint, Heat Affected Zone, Brazed Joints etc.

WHERE VALUES MEET RESULTS

TESTING FACILITIES

Corrosion testing for ferrous and non-ferrous

Corrosion can result in irreversible damage to materials, equipment, assets and pipelines. These losses are not only expensive to rectify in monetary terms, but subsequent equipment failure could result in production downtime, health and safety risks and reputational damage.

Corrosion Testing Solutions

- IGC Practice A, B, C, E, F & W, X, Y & Z
- ASTM A923 Method A, B, and C
- G28 – Method A & B
- G48 – Method A, B, C, D, E & F
- (HIC) – Hydrogen Induced Cracking
- (SCC) – Stress Corrosion Cracking (Room Temp. & High Temp. / High Pressure)
- (CSCC) – Chloride Stress Corrosion Cracking
- Mercurous Nitrate Test
- Mass of Zinc Coating
- IGC Test (Huey Test)

On-Site Testing Facilities:

Positive Material Identification (Test)	Non-Destructive Testing (NDT Services)
In Situ Metallography	Portable Hardness
Surface Roughness Test	Thickness Gauging
Ferrite by ferritoscope	Portable Spectroscope

Calibration witness approval by TPIA

TÜV INDIA
TÜV NORD GROUP
